Description

AMI Healthcare *is an American Hospital Management Corporation providing turn-key solutions in hospital design build operate, planning and feasibility and in hospital commissioning. A leader in international hospital management, we provide services by developing and operating small, medium, and large hospitals worldwide. We collaborate with expert healthcare design and construction firms to build state-of-the-art hospitals that meet the highest international standards and comply with the Joint Commission International (JCI) accreditation standards.*

We are unique in our approach, multi-cultural with our healthcare professionals and always striving for continuous improvement in all we do. We save time and money by developing hospitals which incorporate efficiency, are ecological and follow best practice. Our healthcare design follows design criteria for contemporary healthcare, which inevitably avoids costly modifications, and complies with international design standards.

Our longstanding experience in the international healthcare market enables us to provide services almost anywhere in the world on time and with integration of the cultural aspects of the countries we serve.

Our Hospital Commissioning program develops policies and procedures that govern the operation of each department as well as training and operating manuals. We ensure that all healthcare delivery criteria are met. We strictly follow Science and Research and we incorporate Artificial Intelligence and Smart Technology to enhance the service delivery.

We implement and execute best practice by leveraging cutting-edge technology, clinical intelligence design, artificial intelligence and cutting-edge medicine together with the knowledge and experience of skilled clinicians, experienced administrators, technicians and subject matter experts.
